BUNN®

Customized Beverage Experience

Coffee

Coffee made easy with little room for errors.

Tea

A tea button features a pulsing sequence for steeping action and ideal tea taste.

Iced Tea

Add ice to a tall glass. Brew tea concentrate over the ice.

Iced Coffee

Add ice to a tall glass. Brew coffee concentrate over the ice.

Hot Chocolate

Stir in your favorite mix to produce a steaming hot cup.

Eco-friendly Pods Eliminate Byproduct Waste

Waste is reduced by brewing one fresh cup at a time with adjustable volume settings. Pods are compostable. MY CAFÉ features an energy-saver mode which reduces tank temperature during idle periods.

MY CAFÉ works with the widest variety of pods on the market and can brew from tea bags, too!

From Great Coffee Fragrance, We Deliver Wonderful Aroma

Quality coffee beans have a unique fragrance that contribute to the rich aroma in a brewed beverage. In a recent consumer study conducted by BUNN, over 79% identified aroma as being a key component in the coffee drinking experience. An important difference between a **MY CAFÉ** Pod brewer and a capsule system is that you can enjoy fragrance after opening the pod wrapper and smell the aroma that is produced when the 200 degree (93.3° C) water saturates the grounds.

Better Extraction for Superior Taste

The Jet Action Sprayhead showers the pod to fully saturate the grounds. The stream can also be pulsed (a technique also used on coffee equipment found in commercial coffee bars) to produce full extraction to yield a “gold cup” of coffee. The basket design is engineered with a multi-tiered dispense screen for uniform, optimal extraction.

- Water Jet Spray is engineered to penetrate grounds more fully and evenly for deeper, richer more flavorful coffee
- Pod basket is designed for ideal coffee extraction
- Commercial grade temperature control for superior aroma and ideal extraction
- The **MY CAFÉ** Pod brewers utilize our pulse brew technology to penetrate the coffee's cellular structure to gain superior extraction for better taste
